Capitalizing on our Greenfield Development Expertise

With our exceptional client-centric approach, we have been helping large enterprises, ISVs, and product start-ups design, architect, develop, innovate, and maintain digital-ready applications.

Leveraging our expertise in the greenfield development of enterprise-level Web, Mobile, AI & ML applications at scale, AG specializes in product engineering, agile application development, and Low Code.

With over 3 years of experience in building digital applications, we help modernizing enterprise applications to transition them from legacy to digital native. Our Quality Assurance practice has evolved to address the needs of the digital ecosystem, infusing the best of QA practices into its quality engineering, AI powered test automation and security testing.

Our Services

01 Application Modernization

02 Custom Application Development

03 DevOps

04 Mobile App Development

05 Quality Assurance and Testing

Our Approach

We deploy a full-stack team of Squad to effectively manage the deliverables and timelines of a project. This model brings unprecedented agility, streamlined processes, stronger business alignment, and cost efficiency. Our squad is a cross-functional team of experts in data management, product engineering, and enterprise applications, dedicated to supporting your digital transformation journey. Our approach operates akin to a factory model, through DevOps automation, continuous integration, and continuous delivery.

Automation

Deploy Squad team for agility, streamlined processes, stronger business alignment, and cost efficiency.

Referenceable Customers

Expertise in AI powered test automation.

Why us?

Pod Model

Leverage low-Code development platforms such as PowerApps and Outsystems. Application Dev for web and mobiles apps.

Low-Code / No-Code

Trusted by large global enterprises for developing and architecting enterprise applications projects.
