

Intelligent Compliance Assurance Solutions (ICAS)

One Size Fits All; Effortless Evaluation Process

The regulatory landscape has been complicated and expensive to manage, and it doesn't look any better. The main cost inefficiency lies at the 41% of compliance team spending more than 4 hours a week to create and amending reports for the board.

Efficient compliance management is hindered by some of these factors:

- 01** Siloed function
- 02** Different technology for different compliance
- 03** Disconnected systems
- 04** Manual Processes
- 05** Incomplete or non-existent metrics
- 06** No visibility by cross functions

The hyperconnected world and its data are adding more complexity in the existing process.

The ICAS' is backed by powerful processing automation; with intelligent agents that increase productivity. While decreasing human errors.

Value Positioning

- 

Universal Compliance
One-size-fits-all; compatible across regulations and compliance bodies.
- 

Instant Compliance
Shortened compliance evaluation process from weeks to just hours.
- 

Bias-Free Automation
Zero human touch in data crunching processing to mitigate biasness and human errors.

Distinctive Features

- 

Interoperability; solution is compatible on any platform
- 

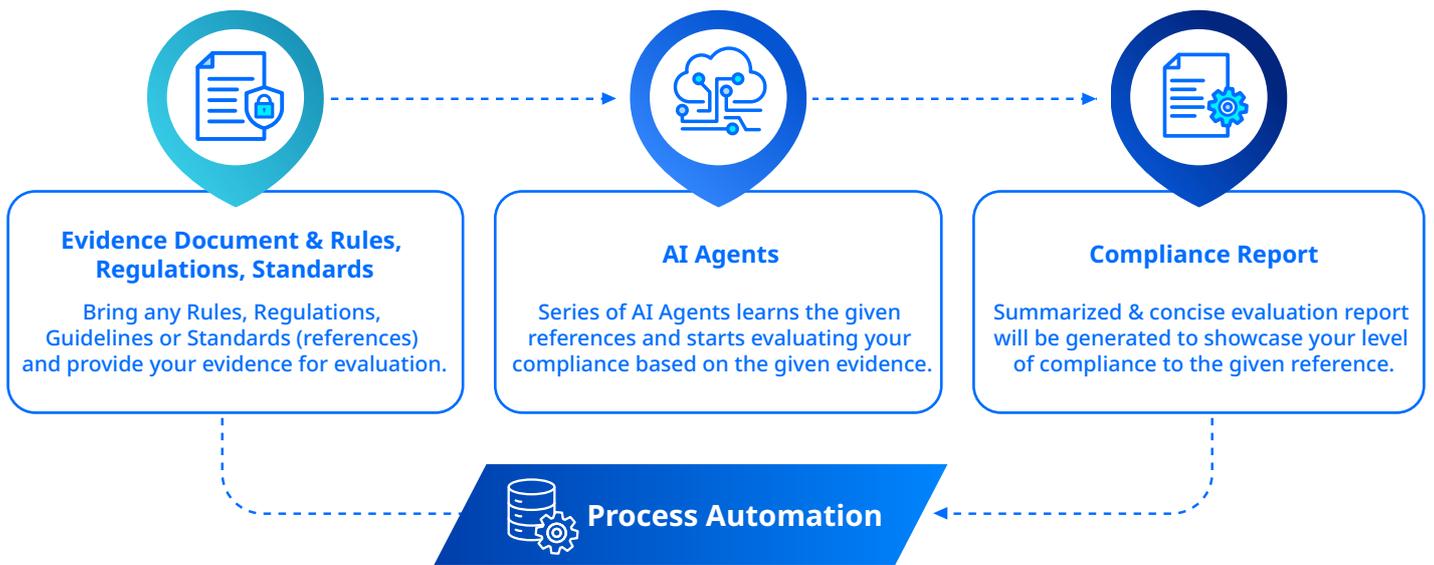

One solution, limitless usage
- 

Automated retrieval of attachments database
- 

PaaS and SaaS model
- 

Dashboard view on compliances percentage
